

Mifare Metal Tag (HF anti-metal tag)

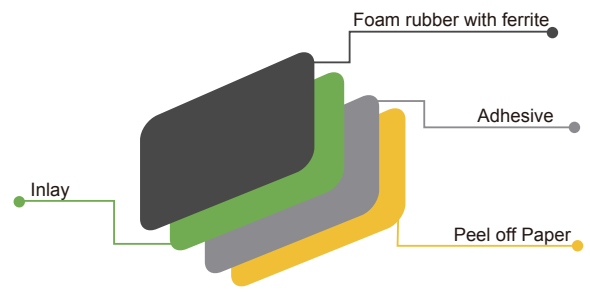

The anti metal tag product of OPRFID Technologies product has extensively been used for gas bottle tagging or direct apply on metal surfaces. we have low cost and good quality for the metal tag. It's semi-rigid multilayer construction allows for affixing this tag to uneven, spherical shapes with demensions of 46*30*3mm, hence compromising somewhat on read distance. Products can be personalised with printing and numbering.

Structure A:

Structure B:

Description

Surface: Glossy or matte
Color: White or custom artwork
Size: 46x31mm, 29x29mm, 15x35mm or Custom
Thickness: 0.3mm to 0.6mm
Frequency: 13.56MHz
Protocol: ISO14443A, ISO15693
Operating temperature: -20°C to +50°C
Option: epoxy surface

Printing options:

Offset Print full colour,
Silkscreen print gold/silver colour

Available HF Chip:

- Mifare 1k, Mifare 4k, Mifare MINI,
- Mifare Ultralight Mifare Ultralight C,
- NXP NTAG203, NTAG210 etc
- Mifare DESFire EV1 2K/4K/8K
- Mifare Plus S 2K/4K, Mifare Plus X 2K/4K
- SLE66R01P
- ICODE SLI, TI2048, TI256
- Inside PICOPASS 2k, PICOPASS 32K
- Legic MIM 256, Legic MIM1024,
- Legic ATC1024, Legic ATC 2048
- SRI512, LRI2K, SRIX4K
- Topaz innovision 96bytes, 512bytes
